

My Observations

HarvTech 10/17/2022

ZE7_CO_Lib Examples Test Fixture Waveforms:

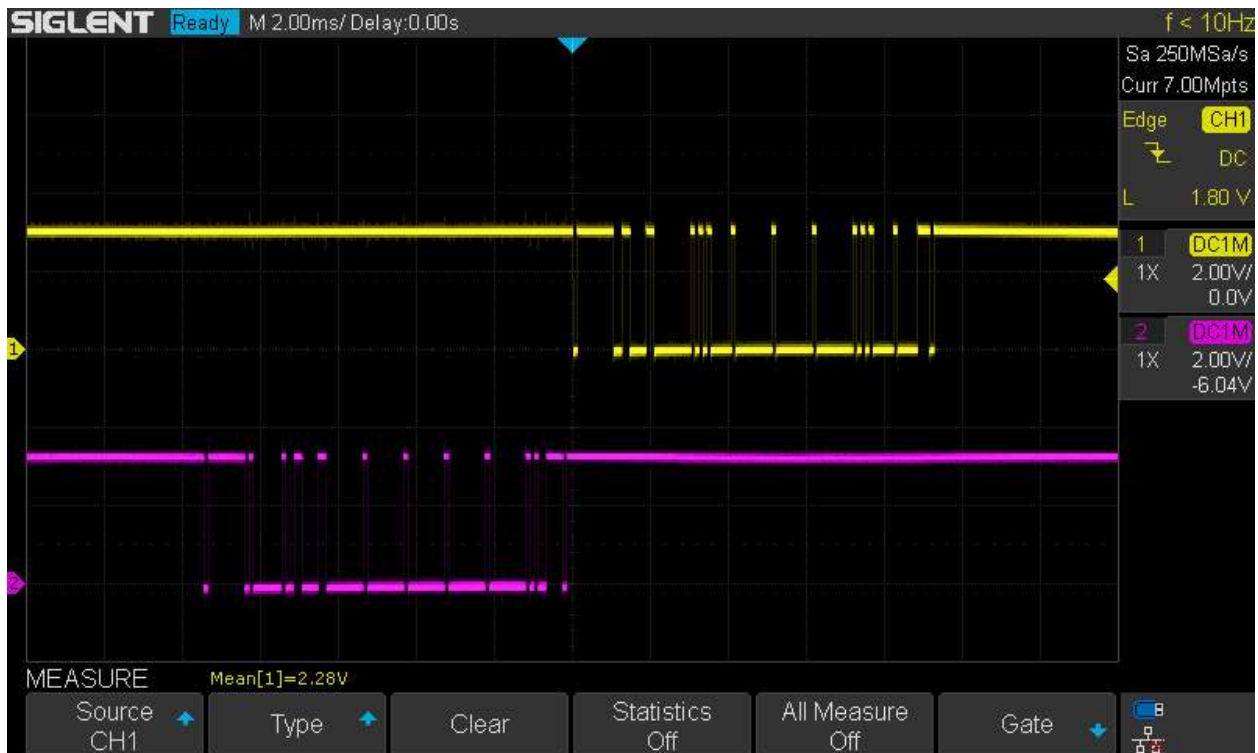

Figure 1

In above Figure 1 the bottom trace is the UART Mode 2 request for data sent to the Module's RX terminal. The top trace is UART data returned at the Module's UART TX terminal.

Figure 2

In above Figure 2 the bottom trace shows read_flag toggled almost immediately after the Module sends UART data shown in the top trace, thereby confirming that the data has been received in either mode.
